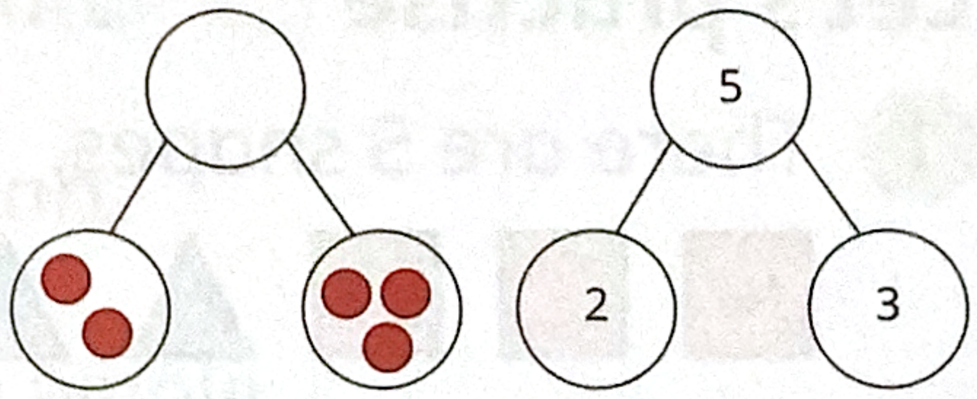
Autumn term

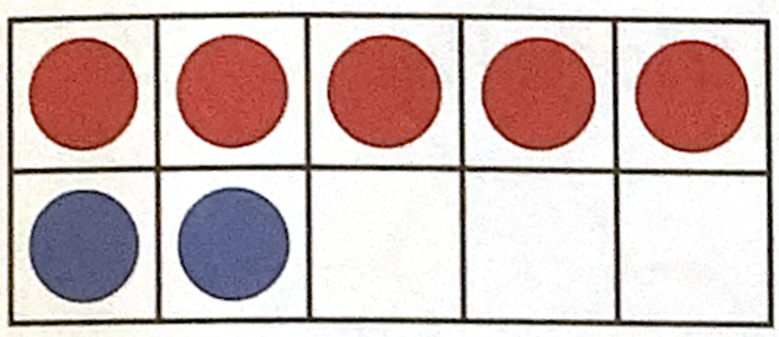
Block 2 Addition and subtraction

In this block, we look at **parts** and **wholes**.

2 is a part. 3 is a part.

The whole is 5



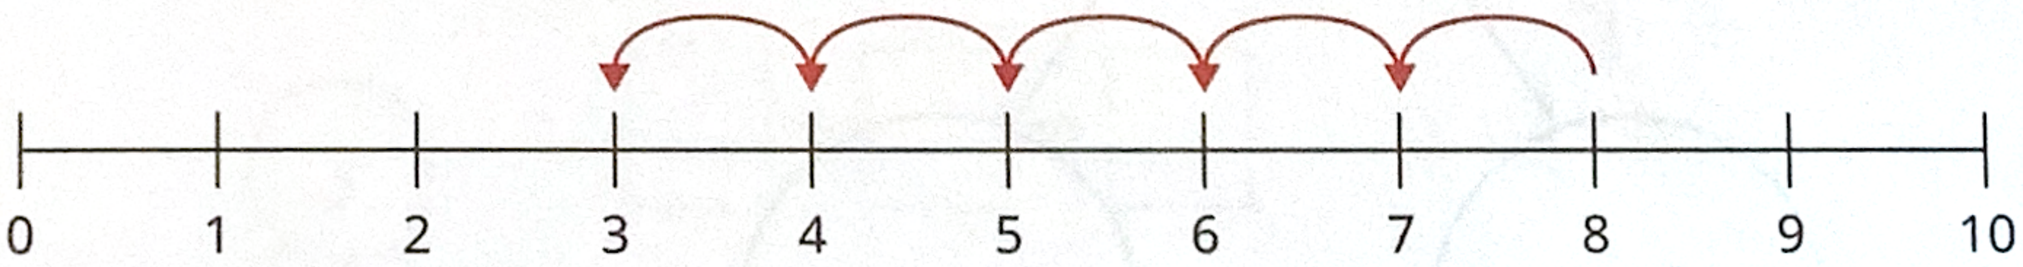


We also **add** numbers using **ten frames**.

This one shows 5 + 2 = 7

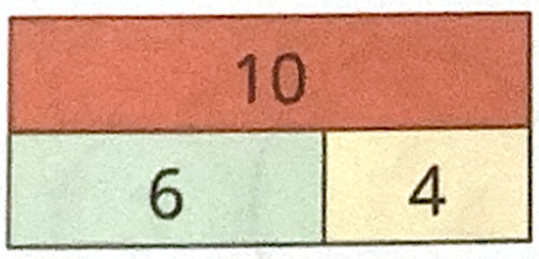
We use **number lines** to **subtract** numbers.

This one shows 8 – 5 = 3



We also use **bar models** to show parts and wholes.

These help us find **fact families** using **number bonds**.



6 + 4 = 10

4 + 6 = 10

10 = 6 + 4

10 = 4 + 6

Here are some maths words that you'll see.

Can you remember what they mean?

whole **part** **add** **subtract** **fact family**

number bond **how many more** **how many left**
