Numeracy

Ask children to make a variety of 3-D shapes using modelling clay.

Ask which shapes are the easiest and hardest to make, and why.

Ask children to describe how they made the flat faces.

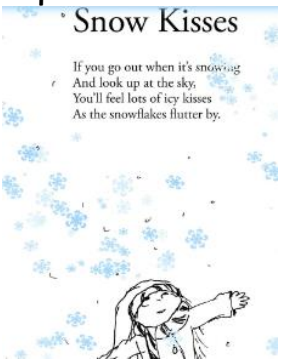

Out and About!

Make a Journey Stick

Literacy

Write a poem about Winter

Working with Others

Christmas is a time of giving. Think of something you could do to give back to someone less fortunate.

Homework Choice Grid

Expressive Arts

A Chair Fit for a Bear!

Design and make a miniature chair for one of your toys using materials you can find at home.

You could use cardboard, paper, building blocks or recycled materials.

Can you make your chair strong and stable enough for your toy to sit on?

Test your chair and see if you can improve it!

Let's Get Technical

Become a photographer!

Use a phone, tablet or camera with an adult to take five photographs of interesting things around your home or garden. Try taking pictures from different angles – up high, down low and close up.

Choose your favourite photograph and explain why you like it.

Health and Wellbeing

My Feelings Toolbox

We have been learning about different emotions, including jealousy. Create a feelings toolbox by drawing or writing three things that help you feel better when you are upset, cross or jealous.

You might choose talking to someone, taking deep breaths or doing something you enjoy.

Social Studies

Holidays Through Time

Talk to a parent, grandparent or older relative about a holiday or day trip they enjoyed when they were younger.

Find out where they went, how they travelled and what they enjoyed doing.

Draw a picture of their holiday and one of your own.

What is the same? What is different?
